

United States of America
vs.
Daniel David Rigmaiden
Case No. CR 08-814-PHX-DGC

Lodged Proposed
Second Supplement to Motion to
Suppress Re: Search and
Seizure of Digital Evidence
under N.D.Cal. Warrants

1 Daniel Rigmaiden
 2 Agency # 10966111
 3 CCA-CADC
 4 PO Box 6300

 Email: none

5 Daniel David Rigmaiden
 Pro Se, Defendant

7 **UNITED STATES DISTRICT COURT**
 8 **DISTRICT OF ARIZONA**

10 United States of America,

11 Plaintiff,

12 v.

13 Daniel David Rigmaiden, et al.,

14 Defendant.

No. CR08-814-PHX-DGC

SECOND SUPPLEMENT TO MOTION TO SUPPRESS
 TO SEARCH AND SEIZURE OF DIGITAL EVIDENCE
 UNDER N.D.Cal. WARRANTS

15
 16 Defendant, Daniel David Rigmaiden, appearing *pro se*, respectfully submits *Second*
 17 *Supplement To Motion To Suppress RE: Search And Seizure Of Digital Evidence Under*
 18 *N.D.Cal. Warrants*.^[1] Based on the newly provided June 21, 2012 evidence,^[2] the newly
 19 provided October 22, 2012 evidence,^[3] and new legal authority that the defendant was

20
 21 1. This filing was originally a “first” supplement (Dkt. #867) and is now a “second”
 22 supplement that will likely be updated again as a “third” supplement considering the
 23 government continues with its four year long protracted discovery process and is yet to
 sufficiently comply with the defendant’s July 5, 2012 discovery request. *See also Reply To*
Government’s Response To Motion For Discovery RE: Digital Evidence Search (Dkt. #930).

24 2. The newly provided June 21, 2012 evidence, as well as other prior evidence recently
 25 made relevant by the newly provided evidence, is attached to the defendant’s *Third*
Submission Of Consolidated Exhibits Relating To Discovery And Suppression Issues (Dkt.
#863).

26 3. The newly provided October 22, 2012 evidence, as well as other prior evidence
 27 recently made relevant by the newly provided evidence, is attached to the defendant’s *Fifth*
Submission Of Consolidated Exhibits Relating To Discovery And Suppression Issues (Dkt.
#929) and *Sixth Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues (Dkt. #933).

1 unable to bring to the Court's attention earlier,^[4] this supplemental filing seeks to supplement
 2 and supersede prior arguments made in the defendant's *Motion To Suppress* (Dkt. #824), and
 3 incorporated *Memorandum Re: Fourth Amendment Violations (re: N.D.Cal. 08-70460-HRL/PVT)* (Dkt. #830-1),
 4 regarding the search and seizure of digital evidence contained on the defendant's physical data storage devices seized from 431 El Camino Real, Apartment No.
 5 1122, Santa Clara, CA 95050 (hereafter "apartment No. 1122"). The arguments in this filing
 6 address constitutional violations and two separate technical violations applicable to the
 7 N.D.Cal. 08-70460-HRL/PVT warrant and (now applicable) N.D.Cal. 08-70502-PVT
 8 warrant.^[5]

9
 10 The defendant's filings at Dkt. #824 and #830-1 reference his prior assumption that
 11 IRS-CI Agent Daun made her initial search and seizure of data—by copying files from
 12 forensic images of the defendant's data storage devices to DVDs and a CD—within 30 days
 13 of the physical search of apartment No. 1122. Although not specifically discussed at Dkt.
 14 #824 and #830-1, the defendant was also under the impression that government actors had
 15 employed keyword searches or other means that would limit "human eye" exposure to *out-of-scope*
 16 data, as required by the relevant warrants. However, after filing Dkt. #824 and
 17 #830-1, the government provided the defendant with new evidence indicating that IRS-CI
 18 Agent Daun initially took 401 days to search and seize data from the images of the
 19 defendant's storage devices seized under the N.D.Cal. 08-70460-HRL/PVT and 08-70502-
 20 PVT warrants. According to the N.D.Cal. warrants, the final day IRS-CI Agent Daun was
 21 permitted to search and seize data from the images was September 2, 2008 (08-70460-HRL/
 22 PVT) and September 3, 2008 (08-70502-PVT) but her search/seizure of data was not
 23 complete until September 8, 2009. Furthermore, after filing Dkt. #824 and #830-1, the

24
 25 4. See United States v. Collins, Case No. 11-CR-00471-DLJ (PSG), Doc. #328
 (N.D.Cal., Aug. 27, 2012).

26 5. The defendant's filings at Dkt. #824 and #830-1 did not originally challenge the
 27 search and seizure of digital evidence stemming from the N.D.Cal. 08-70502-PVT warrant
 28 used to search storage unit No. A-47, CBD Indoor Mini, 570 Cinnabar Street, San Jose,
 California, 95110 (hereafter "storage unit No. A-47"). However, as outlined in this filing,
 the newly discovered technical violation merits a direct challenge to the N.D.Cal. 08-70502-
 PVT warrant.

1 government provided new evidence indicating that IRS-CI Agent Medrano, IRS-CI Agent
 2 Fleischmann, and FBI Agent Murray were also engaged in exploratory rummaging through
 3 clones of the defendant's entire computer system for approximately one year after the
 4 physical search of apartment No. 1122. Furthermore, after filing Dkt. #824 and #830-1, the
 5 government provided new evidence indicating that various government actors failed to
 6 employ means designed to "locate and expose only those categories of files, documents, or
 7 other electronically stored information that are identified with particularity in the
 8 warrant..."^[6] and instead used their "human eyes" to review a multitude of the defendant's
 9 private *out-of-scope* data for an extended period of time. As outlined below, the above
 10 explained newly provided evidence changes the facts of the case and the defendant's
 11 arguments with respect to the government's search and seizure of digital data. The defendant
 12 now needs to update and supersede his prior wholesale suppression argument (*see* Dkt. #830-
 13 1) in light of the newly provided evidence and he also needs to raise new challenges relating
 14 to the newly identified technical violations of the N.D.Cal. 08-70460-HRL/PVT and 08-
 15 70502-PVT warrants. The proceeding sections provide supplemental, corrected, and
 16 superseded facts, arguments, and concluding section as specified in the *'d paragraphs.

17 **I. FACTS: supplemental, corrected, and superseded with respect to the**
government's seizure of digital data.

18 *. In light of the new evidence provided to the defense by the government on June
 19 21, 2012 and on October 22, 2012, the following facts supplement, correct, and supersede
 20 the facts contained in the defendant's *Motion To Suppress* (Dkt. #824), *Memorandum Re:*
 21 *Fourth Amendment Violations* (Dkt. #824-1), *General Facts*, Section IV(B)(17), ¶ Nos. 86-
 22 88, which were incorporated into the *Memorandum Re: Fourth Amendment Violations (re:*
 23 *N.D.Cal. 08-70460-HRL/PVT)* (Dkt. #830-1) and applicable to the arguments contained
 24 therein.

25 1. On August 3, 2008, the government searched apartment No. 1122 while

26 6. E.g., *Submission Of Documents Related To Original Northern District Of California*
 27 *08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122, Warrant,*
 28 *"Computer Search Protocol For The Northern District Of California"* (Dkt. #566-2, p. 17).

1 executing the “AMENDED” version of the N.D.Cal. 08-70460-HRL/PVT warrant.^[7]
 2 During the search, the government physically seized the defendant's home computer,
 3 physical data storage devices, encrypted virtual drives, and other various physical evidence
 4 in the possession of the defendant. During the physical search of the defendant's home and
 5 in the months^[8] following the search, IRS-CI Agent Daun imaged the defendant's data
 6 storage devices and encrypted virtual drives by mirroring/copying them to government hard
 7 drives.^{[9][10]} Likewise, the data storage device and encrypted virtual drive seized from
 8 storage unit No. A-47, during the August 4, 2008 execution of the N.D.Cal. 08-70502-PVT
 9 warrant,^[11] were imaged by IRS-CI Agent Daun in the same fashion.^[12]

10 2. Once the seized data storage devices and encrypted virtual drives were imaged,
 11 IRS-CI Agent Daun began what would end up being a 401-day exploratory rummaging
 12 through the defendant's files contained on his home computer, data storage devices, and
 13 encrypted virtual drives. According to the October 22, 2012 prosecution report, IRS-CI
 14 Agent Daun would not complete her search and seizure of data from the forensic images and
 15

16 7. See *Submission Of Materials Related To Search Warrant No. 08-70460, Authorized*
 17 *By Magistrate Judge Patricia V. Trumbull, Northern District Of California, On July 30,*
2008 (Dkt. #464-1, p. 20) (return).

18 8. See *Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #929-1, p. 8) (table with “1/9/2009” entry marking
 19 the last DriveCrypt encrypted virtual drive that was imaged).

20 9. See *Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI
 21 Agent Tracy L. Daun stating that she conducted a partial live acquisition of the defendant's
 “T” drive using WinRAR and imaged the remainder of the drives using IXimager).

22 10. Throughout this filing, when the defendant refers to “forensic images” or similar and
 23 “encrypted virtual drives” or similar, said terms also encompass the government's live
 24 acquisition of the defendant's “T” drive into a WinRAR archive—which is the same as
 creating a mirror copy of the drive sans preservation of file access dates—and all files
 25 contained therein, both within and beyond the scope of the N.D.Cal. 08-70460-HRL/PVT
 warrant. See *id.*

26 11. See *Submission Of Documents Related To Original Northern District Of California*
08-70502-HRL Search Warrant Used To Physically Search Storage Unit No. A-47 (Dkt.
 27 #846-2).

28 12. See *Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #863-1, p. 29-36) (IRS-CI Agent Daun discussing
 physical data storage device and encrypted virtual drive seized from storage unit No. A-47).

1 virtual machine clones^[13] until September 8, 2009^[14]—371 days past the 30-day deadline
 2 for search/seizure of data as permitted by the N.D.Cal. 08-70460-HRL/PVT warrant^[15] and
 3 370 days past the 30-day deadline for search/seizure of data as permitted by the N.D.Cal. 08-
 4 70502-PVT warrant.^[16]

5 3. In addition to taking 401 days to *complete* her forensic analysis, IRS-CI Agent
 6 Daun took nearly **six months** to even *begin* her forensic analysis of the DriveCrypt
 7 encrypted virtual drives corresponding to “filesalot.dcv,” “filesalot_bak_3-1-2008.dcv,” and
 8 “filesalot_bak_3-31-2008.dcv”^[17]—the drives containing the bulk of the digital *in-scope*
 9 evidence seized from the defendant. Likewise, IRS-CI Agent Daun took more than **nine**
 10 **months** to even *begin* her forensic analysis of the WinRAR live acquisition image of the “T”
 11 drive, *i.e.*, “T_drive.rar”.^[18] Although IRS-CI Agent Daun and the other case agents began
 12 arbitrarily rummaging through virtual machine clones of the defendant's entire computer
 13 system immediately after the physical drives were seized, the forensic analyses intended to
 14 determine whether any irrelevant, personal information was improperly seized was not

15 13. FYI, “encrypted virtual drives” are different from “virtual machine clones.”

16 14. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
 17 *Suppression Issues, EXHIBIT 01* (Dkt. #929-1, p. 9) (table with “8/14/2009 through
 18 9/8/2009” entry stating “Prepared reports and extracted files from the analysis on the
 computer media.”).

 20 *08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122, Warrant,*
 21 *“Computer Search Protocol For The Northern District Of California,” ¶ 5* (Dkt. #566-2, p.
 22 16) (“The government must complete an off-site search of a device that agents removed in
 order to search for evidence of crime as promptly as practicable and **no later than thirty**
 23 **(30) calendar days** after the initial execution of the warrant.” (emphasis added)).

24 16. *See Submission Of Documents Related To Original Northern District Of California*
 25 *08-70502-HRL Search Warrant Used To Physically Search Storage Unit No. A-47,*
 26 *“Computer Search Protocol For The Northern District Of California,” ¶ 5* (Dkt. #846-2, p. 8)
 27 (“The government must complete an off-site search of a device that agents removed in order
 to search for evidence of crime as promptly as practicable and **no later than thirty**
 28 **(30) calendar days** after the initial execution of the warrant.” (emphasis added)).

29 17. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
 30 *Suppression Issues, EXHIBIT 01* (Dkt. #929-1, p. 8) (table with “2/2/2009,” “2/13/2009,”
 31 and “3/1/2009” entries indicating the dates IRS-CI Agent Daun began her forensic analysis
 32 of the defendant's DriveCrypt encrypted virtual drives).

33 18. *See id., EXHIBIT 01* (Dkt. #929-1, p. 9) (table with “5/20/2009” entry stating “Started
 34 analysis on WinRAR live acquisition ran onsite at search warrant.”).

1 started for **any** imaged drive until February 2, 2009.^[19]

2 4. In order to facilitate the seizure of data at the conclusion of her initial 401-day
 3 exploratory rummaging, IRS-CI agent Daun searched through the forensic images, extracted
 4 all files that fell within the scope of the warrants, and then copied some of those files to
 5 DVDs and a CD so that they would be isolated (*i.e.*, seized) from the images. This forensic
 6 search process, occurring off and on between February 2, 2009 and September 8, 2009, took
 7 **219 days** even while IRS-CI Agent Daun admitted that she could have been finished in
 8 roughly **60 days**, *i.e.*, “by late March or early April.”^[20] IRS-CI Agent Daun had plenty of
 9 free time to complete her forensic analysis from the start, however, she instead opted to
 10 spend the first 33 days, *i.e.*, August 3, 2008 through September 4, 2008,^[21] creating virtual
 11 machine clones of the defendant's entire computer system to facilitate the untrained
 12 exploratory rummaging of three other case agents.^[22] Apart from the three other case
 13 agents, the actual process of searching and seizing the defendant's digital data **through a**
 14 **forensic analysis** is explained in IRS-CI Agent Daun's “Computer Forensic Report,”
 15 originally provided to the defense via discovery on February 25, 2010.^[23]—more than **six**
 16 **months** after the report's completion on September 8, 2009. The “Computer Forensic

17 19. *See id.*, EXHIBIT 01 (Dkt. #929-1, p. 8).

18 20. *See Sixth Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #933-1); A review of the entries in the October 22,
 19 2012 table also support IRS-CI Agent Daun's claim of being *capable* of completing the
 20 analysis within **60 days**. IRS-CI Agent Daun's February 27, 2009 admission completely
 21 undermines the prosecution's recent claim that “the length of time that the United States has
 22 spent analyzing the lawfully seized material is reasonable in light of the amount of
 23 incriminating data seized[.]” *Government's Response To Defendant's Motion To Suppress*
 24 (Dkt. #873, p. 66).

25 21. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #929-1, p. 8) (table with 8/3/2008 through 9/4/2008
 26 entries detailing the time IRS-CI Agent Daun devoted to creating the virtual machine clones
 instead of conducting the forensic analysis).

27 22. If IRS-CI Agent Daun had a legitimate excuse for being unable to conduct a timely
 28 search, she could have provided some or all physical drives to the FBI's Computer Analysis
 Response Team (CART)—consisting of personnel trained in digital forensics—considering
 the FBI was actively involved in the investigation.

27 23. *See Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI
 28 Agent Daun RE: search of data storage devices and encrypted virtual drives seized from
 apartment No. 1122 and storage unit No. A-47).

1 Report" states under numerous "Analysis" headings that, "The following is a summary of the
 2 evidence located on the computer that fell within the parameters of the Search Warrant and
 3 the Items to be Seized."^[24]

4 5. As for the files copied/seized by IRS-CI Agent Daun to the CD and DVDs as
 5 *in-scope*, the amount of files falling within the scope of the relevant warrants was only a
 6 small fraction of the total number of files contained within the forensic images of the
 7 defendant's data storage devices and encrypted virtual drives. For examples, under the
 8 "Analysis - T_drive.rar (WinRAR archive)" heading of her "Computer Forensic Report,"
 9 IRS-CI Agent Daun indicated that she seized a total of 3205 files^[25] while the "live
 10 acquisition" image (*i.e.*, the WinRAR archive) contains a total of 26,983 files. In other
 11 words, 88.12 % of the files contained in the WinRAR archive image of the "T" drive are
 12 beyond the scope of the relevant warrant. The following table displays additional file seizure
 13 ratios applicable to various (but not all) data storage devices and encrypted virtual drives that
 14 were imaged by IRS-CI Agent Daun:^[26]

Storage Device Or Encrypted Virtual Drive:	Warrant Relevant To Physical Seizure:	Number Of Files Seized From Images:	Total Number Of Files On Drive:	Percentage Of Imaged Files <u>Beyond</u> Scope Of Warrant:
Analysis - IBM ThinkPad (S/N LV-C4398)	N.D.Cal. 08-70460-HRL/PVT (apartment)	590	60,891	99.03 %
Analysis - T_drive.rar (WinRAR archive)	N.D.Cal. 08-70460-HRL/PVT (apartment)	3205	26,983	88.12 %
Analysis - "filesalot.dcv"	N.D.Cal. 08-	3281	53,520	93.87 %

24. *See id.*, EXHIBIT 01 (Dkt. #863-1, p. 30).

25. *See id.*, EXHIBIT 01 (Dkt. #863-1, p. 11-15).

26. The values contained in the "Number Of Files Seized From Images" column of the
 25 table were calculated by adding together the total number of seized files listed under the
 relevant "Analysis" heading contained in the "Computer Forensic Report." *See id., passim.*
 26 The values contained in the "Total Number Of Files On Drive" column were calculated by
 27 using the ESTsoft ALZip program or Microsoft Windows Explorer program to determine
 how many files were within the relevant forensic image applicable to each drive. *See Third*
 28 *Submission Of Consolidated Exhibits Relating To Discovery And Suppression Issues,*
EXHIBIT 10, EXHIBIT 11, EXHIBIT 12, EXHIBIT 13, and EXHIBIT 14 (screenshots of
 file/folder or archive properties dialog box relevant to each forensic image) (Dkt. #863-1).

1		70460-HRL/PVT (apartment)			
2	Analysis - “filesalot_bak_3-1-2008”	N.D.Cal. 08- 70460-HRL/PVT (apartment)	2244	51,353	95.63 %
3	Analysis - “filesalot_bak_3-31- 2008”	N.D.Cal. 08- 70502-PVT (storage unit)	2784	51,734	94.62 %

6. Although the N.D.Cal. 08-70460-HRL/PVT warrant and N.D.Cal. 08-70502-PVT warrant each state that the 30-day deadline for searching and seizing digital data “may be extended by court order for good cause shown[,]”^[27] the government made no applications to the issuing magistrate or other magistrate to extend the deadlines to search and seize digital data past 30 days. The government’s initial 401-day fishing exhibition was entirely unauthorized.

7. During IRS-CI Agent Daun’s 401-day fishing exhibition into images and virtual machine clones of the defendant’s data storage devices and encrypted virtual drives, which the government admits “actually contain many more files than those that fall within the parameters of the Search Warrant and its attachments[,]”^[28] IRS-CI Agent Medrano, IRS-CI Agent Fleischmann, and FBI Agent Murray also had access to their own virtual copies of the defendant’s entire computer system,^[29] as provided to them by IRS-CI Agent

19 27. *E.g., Submission Of Documents Related To Original Northern District Of California*
20 *08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122, Application,*
21 *Warrant, “Computer Search Protocol For The Northern District Of California,” ¶ 5 (Dkt.*
#566-2, p. 17).

22 28. *Third Submission Of Consolidated Exhibits Relating To Discovery And Suppression*
Issues, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI Agent Daun RE:
search of data storage devices and encrypted virtual drives seized from apartment No. 1122
and storage unit No. A-47, p. 31).

24 29. *See Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 03 (Dkt. #863-1) (August, 2009 emails between IRS-CI Agent
Tracy L. Daun *et al.*: detailing that IRS-CI Agent Medrano, IRS-CI Agent Fleischmann, and
FBI Agent Murray all had their own virtual machine clones of the defendant’s computer
system up to at least August 30, 2009); see also Fifth Submission Of Consolidated Exhibits
Relating To Discovery And Suppression Issues, EXHIBIT 01 (Dkt. #929-1, p. 3) (“The
virtual machines each consisted of the IBM thinkpad computer, the 100GB external hard
drive found in the apartment, the 500GB external hard drive found in the apartment and the
100GB external hard drive found in the storage unit.”). The report also states that “[n]o
other computer media seized from the search warrants were accessible through the virtual

1 Daun as early as August 31, 2008.^[30] The agents' "virtual machines" allowed them to access
 2 clones of the defendant's home computer and all files, including the DriveCrypt encrypted
 3 virtual drives,^[31] as if sitting in front of the defendant's actual powered-on computer and
 4 data storage devices.^[32] In other words, at least three additional case agents engaged in a
 5 year long exploratory rummaging through the defendant's files^[33] while the N.D.Cal. 08-
 6 70460-HRL/PVT and 08-70502-PVT warrants only allowed 30-day examinations. It was
 7 only after IRS-CI Agent Daun completed her initial 401-day search and seizure of data from
 8 the forensic images (by copying data to DVDs and a CD)^[34] that she instructed the other
 9 agents to stop accessing the defendant's computer system and files.^[35] IRS-CI Agent Daun's

10 machines." *Id.* However, this claim is both irrelevant and misleading. First, all other seized
 11 physical media were either blank or contained commercially available software, *i.e.*,
 12 installation CDs. *See id.*, EXHIBIT 02 (Dkt. #929-1, p. 14) (noting Windows Vista CDs,
 13 camera and GPS memory cards, OS recovery CDs, blank CDs, *etc.*). Second, the physical
 14 drive clones accessible via the virtual machines contain full copies of all DriveCrypt
 15 encrypted virtual drives—even those containing only *out-of-scope* data. *See also* fn. No. 31,
infra.

16 30. *See id.*, EXHIBIT 01 (Dkt. #929-1, p. 8) (table entry dated "8/31/2008" reading
 17 "Cloned VM for case agent use").

18 31. The "virtual machines" created by IRS-CI Agent Daun contain precisely the **same**
 19 **data** as the "forensic images." For example, the first noted 100GB external hard drive
 20 contains the DriveCrypt encrypted container file, "filesalot.dcv," which can be decrypted and
 21 mounted as an encrypted virtual drive within the virtual machine. *See Third Submission Of*
22 Consolidated Exhibits Relating To Discovery And Suppression Issues EXHIBIT 01 (Dkt.
 23 #863-1, p. 16) ("Computer Forensic Report" by IRS-CI Agent Daun indicating that
 24 "filesalot.dcv" is contained on the 100GB external hard drive which is, in turn, contained
 25 within virtual machine clones). Additionally, each virtual machine copy allows the user to
 26 access a clone of the operating system running on the defendant's laptop, which includes the
 27 ability to run installed programs and analyze the installed environment.

28 32. *See Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 04 (Dkt. #863-1) (August 10, 2008 email from IRS-CI Agent
 29 Daun to AUSA Battista *et al.*: IRS-CI Agent Daun explaining that "[a] virtual machine
 30 allows me to sit there and view [] [the defendant's] computer, as if I was actually sitting at his
 31 computer[.]").

32 33. The number of occurrences any given government actor accessed the virtual machine
 33 clones will likely forever remain a mystery due the government's failure to preserve
 34 evidence. *See Motion To Suppress All Digital Data Evidence As A Sanction For Failure To*
35 Preserve Evidence (Dkt. #931); *see also Reply To Government's Response To Motion For*
Discovery RE: Digital Evidence Search, Section I(C) (Dkt. #930).

36 34. *Third Submission Of Consolidated Exhibits Relating To Discovery And Suppression*
Issues, EXHIBIT 01 (Dkt. #863-1) ("Computer Forensic Report" by IRS-CI Agent Daun RE:
 37 search of data storage devices and encrypted virtual drives seized from apartment No. 1122
 38 and storage unit No. A-47).

39 35. *See id.*, EXHIBIT 03 (Dkt. #863-1) (August 2009 emails between IRS-CI Agent Tracy

1 instruction to cease the fishing exhibition came on August 28, 2009^[36]—more than a year
 2 after the physical search of apartment No. 1122.

3 8. At the time IRS-CI Agent Medrano, IRS-CI Agent Fleischmann, and FBI
 4 Agent Murray were arbitrarily rummaging through virtual machine clones of the defendant's
 5 entire computer system, not one of them had been previously trained in computer forensic
 6 investigations.^[37] Unlike IRS-CI Agent Daun who failed to apply her training on avoiding
 7 exposure to *out-of-scope* data, the other case agents began their year long exploratory
 8 rummaging knowing they had no relevant training at all. Rather than operate within a
 9 computer forensics environment, the other case agents accessed all of the defendant's data,
 10 including *out-of-scope* data, “as if [] [they] w[ere] actually sitting at his computer”^[38] over
 11 the course of a year.

12 9. As a general matter, IRS-CI Agent Daun is not shy about admitting her
 13 willingness to intentionally delay a search and seizure if doing so serves an unrelated side
 14 purpose that benefits the activities of other agents. While inside the defendant's residence on
 15 August 3-4, 2008, IRS-CI Agent Daun took the time to image more than 100 gigabytes of
 16 data in order to, in her own words, give other agents time “to get a follow up warrant for

18 L. Daun *et al.*: IRS-CI Agent Daun advising the primary case agents that, “[a]t this point, no
 19 one should be viewing the virtual machines.”).

21 37. *See e.g., Submission Of Documents Related To Original Northern District Of*
22 California 08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122,
23 Warrant, “Computer Search Protocol For The Northern District Of California,” Application
(Dkt. #566-1, p. 4-5) (explaining training and experience of IRS-CI Agent Medrano and IRS-
24 CI Agent Fleischmann); id., (Dkt. #566-1, p. 18) (explaining training and experience of FBI
25 Agent Murray). Note: FBI Agent Murray’s computer crime training is very different from
*computer forensic investigations training. See, e.g., Daniel, Larry and Daniel, Lars, *Digital**
*26 *Forensics For Legal Professionals: Understanding Digital Evidence from the Warrant to the**
Courtroom, (Waltham, MA: Syngress Publications, 2012), p. 13 (As for seized digital data,
“[t]he analysis phase is also where the greatest disparity begins to become a factor between
the skills and approach of a ‘computer expert’ and those of a computer or digital forensics
27 expert. While a computer expert may understand many aspects of computer usage and data,
a properly trained forensic expert will be well versed in recovering data as well as in proper
examination techniques.”).

28 38. *Third Submission Of Consolidated Exhibits Relating To Discovery And Suppression*
Issues, EXHIBIT 04 (Dkt. #863-1).

1 some additional items in the apartment.”^[39] IRS-CI Agent Daun conducted this needless
 2 and lengthy on-site imaging even while she planned to “seiz[e] everything - including the
 3 items [] [she] imaged...” anyways.^[40] Rather than simply seize the physical drives and image
 4 them off-site, as permitted by the N.D.Cal. 08-70460-HRL/PVT warrant, IRS-CI Daun’s
 5 intentional foot-dragging allowed other agents to hang-out in the defendant’s home for 27
 6 hours.^[41] Hardly requiring a 27-hour search, the defendant’s home is only 489 ft²,^[42]
 7 contained minimal possessions,^[43] and was clean and orderly.^[44]

8 10. Even after IRS-CI Agent Daun completed her 371-day late search and seizure
 9 of data from the defendant, and even after IRS-CI Agent Daun’s August 28, 2009 instruction
 10 that, “[a]t this point, no one should be viewing the virtual machines[,]”^[45] she still continued
 11 her personal exploratory rummaging into the forensic images at least until January 1, 2012,
 12 ^[46] i.e., an additional 28 months following the September 8, 2009 creation of the noted CD
 13 and DVDs. For example, IRS-CI Agent Daun re-accessed the original images (i.e., the
 14 encrypted virtual drives containing “many more files than those that fall within the

Issues, EXHIBIT 03 (Dkt. #863-1).

25 46. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #929-1, p. 9) (table indicating that IRS-CI Agent
 Daun reaccessed the forensic images on “1/12/2012” to extract data for the prosecution).

1 parameters of the Search Warrant and its attachments[”])^[47] in October of 2011.^{[48][49]}
 2 While re-accessing the forensic images, IRS-CI Agent Daun copied the file
 3 “agj_bag_liner_jagbags.co.nz.txt”—a file not even listed in her original “Computer Forensic
 4 Report.”^[50] After becoming aware of the defendant's planned Fourth Amendment
 5 challenges around March of 2012, the prosecution instructed IRS-CI Agent Daun to cease
 6 her re-accessing of the forensic images and virtual machine clones, which contain *out-of-*
 7 *scope* data, and to stop her copying/seizing of additional files into evidence.^[51]

8 11. While conducting her more than three year long exploratory rummaging into
 9 the defendant's data, IRS-CI Agent Daun did not employ means designed to “locate and
 10 expose only those categories of files, documents, or other electronically stored information
 11 that are identified with particularity in the warrant...”^[52]—as was required by the applicable
 12 “Computer Search Protocol.” Instead, IRS-CI Agent Daun used her “human eyes” to review
 13 a multitude of the defendant's files—**possibly all of them**—in order to determine which files

15 47. *Third Submission Of Consolidated Exhibits Relating To Discovery And Suppression*
 16 *Issues*, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI Agent Daun RE:
 17 search of data storage devices and encrypted virtual drives seized from apartment No. 1122
 and storage unit No. A-47, p. 31).

18 48. *See id.*, EXHIBIT 08 (Dkt. #863-1) (government discovery providing
 19 “agj_bag_liner_jagbags.co.nz.txt” (seized from forensic image of the defendant's data
 storage device) containing personal communications between the defendant (under his alias
 of Andrew Johnson) and Jacqueline Gardiner).

Suppression Issues, EXHIBIT 088 (Dkt. #821-5, p. 37) (March 7, 2012 IRS Memorandum
 21 for Transmittal of Electronically Stored Information by IRS-CI Agent Daun, stating that the
 “agj_bag_liner_jagbags.co.nz.txt” file was obtained in October of 2011).

22 50. *See id.*, EXHIBIT 088 (Dkt. #821-5, p. 38) (March 7, 2012 IRS Memorandum for
 23 Transmittal of Electronically Stored Information by IRS-CI Agent Daun, stating that “[t]he
 24 above file [agj_bag_liner_jagbags.co.nz.txt] is located in a DriveCrypt encrypted volume
 named filesalot.dcv on the Toshiba 100GB hard drive... The agj_bag_liner_jagbags.co.nz.txt
 file is not individually listed in the analysis reports.” (emphasis added)).

25 51. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #929-1, p. 9) (table with “3/7/2012” entry stating
 26 “Resubmitted report to AUSA from 12/16/2012 request to only include files that were
 included in initial analysis completed September 2009”).

27 52. *E.g., Submission Of Documents Related To Original Northern District Of California*
08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122, Warrant,
 28 “Computer Search Protocol For The Northern District Of California” (Dkt. #566-2, p. 17).

1 qualified as *in-scope* data.^[53] IRS-CI Agent Daun conducted her abrasive “human eye”
 2 review even after determining in August of 2008 that the defendant used very descriptive and
 3 accurate file/folder labeling for all *in-scope* document data.^[54] The defendant's practice of
 4 precisely naming the noted *in-scope* files to reflect content was so extensive and accurate
 5 that IRS-CI Agent Daun included the full file paths corresponding to *in-scope* data she
 6 provided to an FBI computer programmer considering she believed the defendant's detailed
 7 and accurate file/folder labeling would be helpful to the programmer's analysis of the data.
 8 [55] Rather than extract *in-scope* files based on the defendant's descriptive and accurate
 9 file/folder labeling, and/or based on extensive use of keyword searches, and/or through some
 10 other means, IRS-CI Agent Daun opted for file-by-file, “human eye” exploratory rummaging
 11 and employed only rare keyword searches to locate credit card numbers.^[56]

12 12. Although the prosecution now claims that during her “human eye” review IRS-
 13 CI Agent Daun “ignored” any file falling outside the scope of the relevant warrants,^[57]
 14 various emails sent by IRS-CI Agent Daun tell otherwise. For example, IRS-CI Agent
 15 Daun's “human eye” exploratory rummaging allowed her to learn that the defendant had an
 16 interest in outdoor activities, vitamins, and nutrition^[58]—interests having nothing to do with

17 53. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
 18 *Suppression Issues*, EXHIBIT 01 (Dkt. #929-1, p. 7) (“Her main search consisted of
 19 reviewing files and making determinations whether the file fell within the scope of the
 20 warrant. If the file did appear to fall within the scope of the warrant, she marked it for
 inclusion in her final report. If it did not appear to fall within the scope of the warrant, she
 ignored the file.”).

21 54. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
 22 *Suppression Issues*, EXHIBIT 04 (Dkt. #929-1, p. 21) (IRS-CI Agent Daun noting that the
 23 defendant “tended to be kind of descriptive” with file and folder names corresponding to data
 responsive to the relevant warrants.). As a purely hypothetical example, if the defendant had
 24 a text file on his computer that contained IRS tax code, he would have named the file/folder
 something like “T:\information\taxes\IRS_tax_code.txt”.

25 55. *See id.*

26 56. As noted by the prosecution, the only keyword searches used by IRS-CI Agent Daun
 —which were notably “rare”—consisted of credit card numbers. *See id.*, EXHIBIT 01 (Dkt.
 #929-1, p. 7).

27 57. *See id.*, EXHIBIT 01 (Dkt. #929-1, p. 7) (“If the file did appear to fall within the
 scope of the warrant, she marked it for inclusion in her final report. If it did not appear to
 fall within the scope of the warrant, **she ignored the file.**” (emphasis added)).

28 58. *See id.*, EXHIBIT 03 (Dkt. #929-1, p. 18) (At the time of her extended 3-year+ search

1 the crimes alleged or evidence listed in the relevant warrants. Rather than ignore the *out-of-*
 2 *scope* files relating to outdoor activities, vitamins, and nutrition, IRS-CI Agent Daun **shared**
 3 **her knowledge** with the prosecution and even posited that she collect those *out-of-scope* data
 4 files for AUSA Battista's personal review.^[59] Complete knowledge gleaned from the various
 5 government actors conducting "human eye" reviews of the defendant's *out-of-scope* data
 6 may never be known due to the government's failure to preserve evidence pertaining to what
 7 files each government actor "looked at."^[60]

8 13. The one of many files accessed by IRS-CI Agent Daun after September 8,
 9 2009, *i.e.*, "agj_bag_liner_jagbags.co.nz.txt," contains personal communications between the
 10 defendant^[61] and Jacqueline Gardiner.^[62] Similar to the data relating to outdoor activities,
 11 vitamins, and nutrition, the information contained in the file is not relevant to the charges
 12 against the defendant and the government has provided no explanation as to how the file
 13 helps its case. In fact, in response to an inquiry regarding IRS-CI Agent Daun's belated
 14 seizure of "agj_bag_liner_jagbags.co.nz.txt," AUSA Battista informed the defendant that
 15 government "[s]earches for evidence to be used in this case are being limited to the materials
 16 indexed in the February 25, 2010, discovery."^[63] The February 25, 2010 discovery referred
 17 to by AUSA Battista is IRS-CI Agent Daun's September 8, 2009 "Computer Forensic
 18 Report,"^[64] corresponding to the later provided CD and DVDs which do not contain

19 in December of 2011, IRS-CI Agent Daun asked AUSA Frederick A Battista, "Do you care
 20 about the purchase of the outdoor equipment / clothes? Vitamins /nutritional stuff?").

21 59. *See id.*

22 60. *See Motion To Suppress All Digital Data Evidence As A Sanction For Failure To*
Preserve Evidence (Dkt. #931); *see also Reply To Government's Response To Motion For*
Discovery RE: Digital Evidence Search, Section I(D) (Dkt. #930).

23 61. The defendant's communication was under his alias of Andrew Johnson. *See*
 declaration RE: *Daniel Rigmaiden owns the aircard and used the aircard service as a home*
Internet connection, ¶ 4, p. 2 (Dkt. #824-3) (explaining that the defendant used the alter ego
 of "Andrew Johnson").

24 62. *See Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 08 (Dkt. #863-1) ("agj_bag_liner_jagbags.co.nz.txt").

25 63. *See Second Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 088 (Dkt. #821-5) (March 7, 2012 IRS Memorandum for
 Transmittal of Electronically Stored Information by IRS-CI Agent Daun).

26 64. *See Third Submission Of Consolidated Exhibits Relating To Discovery And*

1 “agj_bag_liner_jagbags.co.nz.txt.”^[65] The government has provided no explanation for
 2 IRS-CI Agent Daun's and other agents' non-stop—more than three year long—exploratory
 3 rummaging through the defendant's personal files that hold no relevance to the government's
 4 case and are outside the scope of the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT
 5 warrants.

6 **II. ARGUMENT: supplemental, corrected, and superseded with respect to**
 7 **the government's seizure of digital data.**

8 *. In light of the new evidence provided to the defense by the government on June
 9 21, 2012 and on October 22, 2012, and in light of new legal authority issued in *Collins*, the
 10 following arguments supplement, correct, and supersede the arguments contained in the
 11 defendant's *Motion To Suppress* (Dkt. #824), *Memorandum Re: Fourth Amendment*
 12 *Violations (re: N.D.Cal. 08-70460-HRL/PVT)* (Dkt. #830-1), *Argument*, Section II(C).
 13 However, arguments relating to the defendant's reasonable expectation of privacy in his data
 14 contained on his hard drives, encrypted virtual drives, and the forensic images / virtual
 15 machine clones created therefrom—as they are in the possession of the government—
 16 established in the defendant's *Motion To Suppress* (Dkt. #824), *Memorandum Re: Fourth*
 17 *Amendment Violations* (Dkt. #824-1), *Argument*, Section V(C)(10), remain
 18 unchanged/unaffected and, pursuant to LRCiv 7.1(d)(2) when referenced through LRCrim
 19 12.1, are hereby incorporated into this filing by reference.

20 **A. Wholesale suppression is merited considering case agents turned**
 21 **the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants into**
 22 **general warrants while flagrantly disregarding their terms.**

23 The government's unauthorized, more than three year long, “human eye” exploratory
 24 rummaging through the defendant's digital data merits wholesale suppression of all evidence

25 Suppression Issues, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI
 26 Agent Daun RE: search of data storage devices and encrypted virtual drives seized from
 apartment No. 1122 and storage unit No. A-47).

27 65. See *Second Submission Of Consolidated Exhibits Relating To Discovery And*
 28 *Suppression Issues, EXHIBIT 088* (Dkt. #821-5) (March 7, 2012 IRS Memorandum for
 Transmittal of Electronically Stored Information by IRS-CI Agent Daun wherein IRS-CI
 Daun admits that “agj_bag_liner_jagbags.co.nz.txt” is not listed in her analysis reports).

1 seized under the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants^[66] or, at the
 2 very least, wholesale suppression of all seized digital evidence. “[W]here there is a ‘flagrant
 3 disregard’ for the terms of the warrant, the district court may suppress all of the evidence,
 4 including evidence that was not tainted by the violation.” United States v. Chen, 979 F.2d
 5 714, 717 (9th Cir. 1992) (citing United States v. Medlin, 842 F.2d 1194, 1199 (10th Cir.
 6 1988)); *see also* United States v. Sears, 411 F.3d 1124, 1131 (9th Cir. 2005) (“Wholesale
 7 suppression is an extraordinary remedy that is appropriate only when the officers transform
 8 the search into an impermissible general search by ignoring the terms of the warrant and
 9 engaging in indiscriminate fishing.” (internal quotation marks and citation omitted)). In the
 10 subsections that follow, the defendant will explain how the case agents flagrantly disregarded
 11 the time limitations and minimization terms contained in the N.D.Cal. warrants’ “Computer
 12 Search Protocol”^[67] in order to advance a more than three year long fishing exhibition into
 13 the defendant’s digital data. The subsections that follow will also show that the
 14 government’s misconduct resulted in prejudice in the form of unnecessary exposure to
 15 private *out-of-scope* data and indiscriminate sharing of information gleaned from that data.

16 **1. The government facilitated its fishing exhibition by flagrantly
 17 disregarding the 30-day search window term contained in the
 18 N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants.**

19 The relevant N.D.Cal. warrants dictated exactly how the government was to search
 20 the data storage devices seized from apartment No. 1122 and storage unit No. A-47. The

21 66. As explained in the facts above, the government’s exploratory rummaging also applied
 22 to the images of the data storage device and encrypted virtual drive seized from storage unit
 23 No. A-47 during execution of the N.D.Cal. 08-70502-PVT warrant. However, as long as the
 24 defendant successfully argues for *wholesale* suppression of all digital evidence seized in the
 25 context of the N.D.Cal. 08-70460-HRL/PVT warrant, all digital and physical evidence seized
 26 from storage unit No. A-47 would also be suppressed considering the N.D.Cal. 08-70502-
 27 PVT warrant stemmed from digital evidence seized under the N.D.Cal. 08-70460-HRL/PVT
 28 warrant, *i.e.*, a fruit-of-the-poisonous-tree. *See Third Submission Of Consolidated Exhibits
 Relating To Discovery And Suppression Issues*, EXHIBIT 05 (Dkt. #863-1) (explaining how
 a text file seized from an encrypted virtual drive seized from apartment No. 1122 led to the
 search of storage unit No. A-47).

67. The government has effectively seized **all** of the data contained on the defendant’s
 physical data storage devices and encrypted virtual drives even while it knows that most of
 the data is beyond the scope of the relevant warrants. At best, the government was only
 authorized to preserve digital evidence but this does not mean that agents can continue to
 rummage through preserved digital evidence over a three year period while it is intermingled
 with data not within the scope of the warrants.

warrants required that the government “complete an off-site search of a device that agents removed in order to search for evidence of crime as promptly as practicable and no later than thirty (30) calendar days after the initial execution of the warrant[,]”^[68] unless a time extension is obtained from the court “for good cause shown.”^[69] Instead of completing her search and seizure of data within 30 days as required by the warrants, or seeking extensions of time from the issuing magistrates, IRS-CI Agent Daun forestalled even *beginning* her forensic analysis of the forensic images for six months^[70] – an analysis intended to determine whether any irrelevant, personal information was improperly seized. In *Metter*, the court found that the government may not “seize and image electronic data and then retain that data with no plans whatsoever to *begin* review of that data to determine whether any irrelevant, personal information was improperly seized.”^[71] Rather than *begin* the forensic analysis, let alone complete it, IRS-CI Agent Daun spent the first 33 days^[72] creating and then sharing a virtual machine clone of the defendant's entire computer system with IRS-CI Agent Medrano, IRS-CI Agent Fleischmann, and FBI Agent Murray.^[73] The three noted case agents used their virtual machines to arbitrarily rummage through the defendant's personal files—most of which are beyond the scope of the warrant—for approximately one year.^[74] Likewise, IRS-CI Agent Daun conducted her initial fishing exhibition via the virtual machines for approximately six months and then via the forensic images for

68. *E.g., Submission Of Documents Related To Original Northern District Of California 08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122, Warrant*, ¶ 5, p. 2 (Dkt. #566-2, p. 16).

69. *Id.*, ¶ 5 (Dkt. #566-2, p. 17).

70. *See Facts*, Section I, ¶ No. 3, *supra*.

71. *United States v. Metter*, No. 10-CR-600 (DLI), Doc. 219, p. 16 (E.D.N.Y., May 17, 2011) (“The government’s blatant disregard for its responsibility in this case is unacceptable and unreasonable.”). Notably, the *Metter* court found a Fourth Amendment violation even while the applicable warrant had no express time limitation like the warrants relevant in the present case.

72. *See Facts*, Section I, ¶ No. 4, *supra*.

73. *See Facts*, Section I, ¶ No. 7, *supra*.

74. The three noted case agents received their virtual machine clones as early as August 31, 2008 and were instructed by IRS-CI Agent Daun to stop accessing them on August 28, 2009. *See id.*

1 approximately seven months.^[75] The later seven month forensic search process, occurring
 2 off-and-on between February 2, 2009 and September 8, 2009, took **219 days** even while
 3 IRS-CI Agent Daun admitted that she could have been finished in roughly **60 days**, *i.e.*, in
 4 her own words, “by late March or early April.”^[76] Still out for the catch, IRS-CI Agent
 5 Daun then continued with an additional 28 month long fishing exhibition into the defendant's
 6 private *out-of-scope* data via repeated re-accessing of her copy of the virtual machine clone
 7 and forensic images.^[77] Sometime in March of 2012, after becoming aware of the
 8 defendant's plan to challenge IRS-CI Agent Daun's and other agents' misconduct, AUSA
 9 Battista finally gave an instruction to IRS-CI Agent Daun to cease re-accessing the virtual
 10 machine clone and forensic images and to only access the *in-scope* data seized to her
 11 September 8, 2009 CD and DVDs.^[78] As icing on the cake, the prosecution took more than
 12 six months, *i.e.*, until February 25, 2010, to even provide the defendant with a copy of the
 13 “Computer Forensic Report” and list of files copied/seized completed by September 8, 2009.
 14 [79]

15 The directive contained in the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT
 16 warrants, requiring that all digital evidence be searched and seized from the forensic images
 17 within 30 days unless an extension of time is granted, is intended to ensure, among other
 18 protections, that the issuing magistrate supervise a protracted search so as to prevent
 19 exploratory rummaging through files not within the scope of the warrant. Not only did IRS-
 20 CI Agent Daun and other agents flagrantly disregard the plain terms of the warrants, their
 21

22 75. *See Facts*, Section I, ¶ Nos. 3-4, *supra*.

23 76. *See Facts*, Section I, ¶ No. 4, *supra*. IRS-CI Agent Daun's February 27, 2009
 admission completely undermines the prosecution's recent claim that “the length of time that
 the United States has spent analyzing the lawfully seized material is reasonable in light of the
 amount of incriminating data seized[.]” *Government's Response To Defendant's Motion To
 Suppress* (Dkt. #873, p. 66). Further contradicting the government's claim, the October 22,
 2012 prosecution report indicates that IRS-CI Agent Daun took one to three calendar days to
 examine most of the forensic images. *See Fifth Submission Of Consolidated Exhibits
 Relating To Discovery And Suppression Issues*, EXHIBIT 01 (Dkt. #929-1, p. 8-9).

24 77. *See Facts*, Section I, ¶ No. 10, *supra*.

25 78. *See id.*

26 79. *See id.*

1 doing so resulted in the type of protracted exploratory rummaging the warrants intended to
 2 prevent. Unlike the situations in *Ivers*^[80] and *Hill*,^[81] IRS-CI Agent Daun's delay was first
 3 motivated by a desire to advance the fishing exhibition by creating virtual machine clones for
 4 the other untrained^[82] case agents—a process of which she **devoted the first 33 days**^[83]
 5 following the physical searches. Even if one were to assume a busy schedule, IRS-CI Agent
 6 Daun made no attempt to lighten her workload by providing physical drives to the available
 7 FBI unit specifically trained in digital forensic investigations.^[84] IRS-CI Agent Daun not
 8 “want[ing] to have to eat [] [her] words!”^[85] in the “IRS-CI vs. FBI” agency rivalry may
 9 have played a role in her decision to not take advantage of available resources in the multi-
 10 agency investigation. In any event, there was neither permission nor justification for IRS-CI
 11 Agent Daun and three additional untrained agents to violate the terms of the warrants by
 12 conducting an initial 401-day fishing exhibitions into virtual machine clones of the
 13 defendant's computer system while it “actually contain[ed] many more files than those that
 14 fall within the parameters of the Search Warrant and its attachments.”^[86] Likewise, IRS-CI
 15 Agent Daun's thereafter additional 28-month long personal fishing exhibition, which

16 80. Compare *United States v. Ivers*, 430 F. App'x 573 (9th Cir. 2011) (“Given the
 17 circumstances of this case [(which involved a warrant with no express time limits)] and the
 18 nature of the seized materials, the FBI acted diligently and offered a reasonable explanation
 (footnote omitted)).

19 81. Compare *United States v. Hill*, 459 F.3d 966, 977 (9th Cir. 2006) (“Because the
 20 officers were motivated by considerations of practicality rather than by a desire to engage in
 21 indiscriminate fishing, we cannot say that the officers so abused the warrant's authority that
 22 the otherwise valid warrant was transformed into a general one, thereby requiring all fruits to
 23 be suppressed” (citations and markup omitted)).

24 82. See *Facts*, Section I, ¶ No. 8, *supra* (explaining how the other case agents were not
 25 trained in computer forensic investigations).

27 84. I.e., the FBI Computer Analysis Response Team (CART).

28 85. *Sixth Submission Of Consolidated Exhibits Relating To Discovery And Suppression
 Issues*, EXHIBIT 02 (Dkt. #933-1) (“the AUSA didn't believe that the IRS had the resources
 to do this and wanted to bring the FBI in. He also thought their CART people were better
 suited for this. We stood up for ourselves and I don't want to have to eat my words! :-”).

86. See *Third Submission Of Consolidated Exhibits Relating To Discovery And
 Suppression Issues*, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI
 Agent Daun RE: search of data storage devices and encrypted virtual drives seized from
 apartment No. 1122 and storage unit No. A-47).

1 occurred after she instructed other agents to stop rummaging through the defendant's files,
 2 was also done without permission or justification. The above explained inexcusable,
 3 unauthorized, and illegitimately motivated delays support the defendant's claim of
 4 exploratory rummaging and indiscriminate fishing.

5 In *Collins*, the Court denied a motion to suppress after addressing a government
 6 "failure to comply with the warrant as to a separate time line which had been established for
 7 **creation of... a mirror image** of the computer contents – which was an anticipated means
 8 for carrying out a forensic examination of the computer."^[87] The Court in *Collins* denied the
 9 motion to suppress because the subsequent **search** "was completed within th[e] time
 10 [specified] and was in full compliance with the terms of the Search Warrant."^[88] However,
 11 the 30-day search window violation at issue in the present case is clearly distinguishable.
 12 Unlike the defendant in *Collins*, this defendant is not pushing the government's failure to
 13 create forensic images in a timely manner—a separate violation altogether. Rather, he is
 14 challenging the government's failure to complete the actual **search** within the time frames
 15 specified in the relevant warrants. The violation at issue here is much more severe
 16 considering it involves the actual **search** as opposed to a ministerial action of simply
 17 mirroring the seized physical drives and DriveCrypt encrypted virtual drives. The court in
 18 *Collins* denied the motion to suppress because "[t]he timing violation affects a mechanism
 19 used for the search, it does not affect the search itself."^[89] In the present case, the
 20 government's exploratory rummaging was conducted well beyond the 30-day time frames
 21 and clearly affected the search itself by turning it into a general search.

22 **2. The government facilitated its fishing exhibition by flagrantly
 23 disregarding the minimization terms contained in the N.D.Cal.
 08-70460-HRL/PVT and 08-70502-PVT warrants.**

24 Evidence of indiscriminate fishing is firmly established by the first 401-day multi-
 25 agent search—which occurred mostly outside of a computer forensics environment—and the

26

87. United States v. Collins, Case No. 11-CR-00471-DLJ (PSG), Doc. #328, p. 6
 27 (N.D.Cal., Aug. 27, 2012) (emphasis added).

28 88. *Id.*

29 89. *Id.* at p. 7.

1 thereafter 28-month search by IRS-CI Agent Daun, both involving unauthorized government
 2 rummaging through virtual machine clones and forensic images that “actually contain many
 3 more files than those that fall within the parameters of the Search Warrant and its
 4 attachments.”^[90] However, further exacerbating the fishing exhibition, government actors
 5 also failed to employ means designed to “locate and expose only those categories of files,
 6 documents, or other electronically stored information that are identified with particularity in
 7 the warrant...”^[91] First, while not being trained on how to segregate and avoid exposure to
 8 *out-of-scope* data,^[92] IRS-CI Agent Medrano, IRS-CI Agent Fleischmann, and FBI Agent
 9 Murray used their virtual machine clones to arbitrarily rummage through the defendant's
 10 personal files. “Failing to follow accepted best practices leaves the work of the forensic
 11 examiner open to challenge and the possibility of the evidence collected being
 12 suppressed.”^[93] Rather than use EnCase or AccessData FTK,^[94] which have numerous
 13 tools to assist examiners in limiting exposure to *out-of-scope* data,^[95] the three noted case
 14 agents conducted their arbitrary rummaging as if they were actually sitting at the defendant's
 15 powered-on computer over the course of a full year.^[96] Second, IRS-CI Agent Daun did not

16 90. *See id.*

17 91. *E.g., Submission Of Documents Related To Original Northern District Of California*
 18 *08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122, Warrant,*
 19 *“Computer Search Protocol For The Northern District Of California”* (Dkt. #566-2, p. 17).

20 92. Unlike IRS-CI Agent Daun, the noted case agents did not have computer forensic
 21 investigations training and were otherwise not trained on how to avoid exposure to private
 22 *out-of-scope* data intermingled with *in-scope* data. *See Facts, Section I, ¶ No. 8, supra.*

23 93. Daniel, *Digital Forensics For Legal Professionals*, p. 26. “Certifications for persons
 24 in the field, [] [are] the EnCase Certified Examiner (EnCE), the Computer Certified Examiner
 25 (CCE), the Access Certified Examiner (ACE), the Computer Forensics Certified Examiner
 (CFCE), and the GIAC Certified Forensic Analyst (GCFA), to name a few[.]” *Id.*, p. 25.

26 94. *See Guidance Software [website], EnCase Forensic - Computer Forensic Data*

28 95. For example, AccessData FTK has advanced search features that include stemming,
 29 phonic, synonyms, related, and fuzzy, which intelligently locate misspelled words and typos.
 30 AccessData FTK also has culling features including filters and facets designed to locate only
 31 *in-scope* data.

96. *See Facts, Section I, ¶ No. 8, supra.*

begin accessing the forensic images using EnCase until six months after the start of her own arbitrary rummaging via her copy of the virtual machine clone.^[97] Third, while finally conducting her forensic analysis, IRS-CI Agent Daun continued to use her “human eyes” to review a multitude of the defendant's files—**possibly all of them**—in order to locate *in-scope* data to copy to her CD and DVDs.^[98] IRS-CI Agent Daun utterly failed to “expose only those categories of files, documents, or other electronically stored information that are identified with particularity in the warrant...”^[99] IRS-CI Agent Daun conducted her total “human eye” review even after discovering early on that the defendant was meticulous in accurately and precisely labeling relevant file and folder names to reflect the *in-scope* data content of any given file.^[100] Likewise, IRS-CI Agent Daun opted for a “human eye” review rather than make extensive use of the EnCase and/or AccessData FTK keyword search feature and other modern day technology^[101] which would have identified only the files that were *in-scope* while shielding those that were *out-of-scope*. Fourth, the defendant has suffered prejudice in the form of government actors exposing themselves to *out-of-scope* data/information and then sharing it with others.^[102] The following subsections provide a detailed analysis of the above points in light of relevant case law.

a Keywords searches are adequate for complying with a warrant's express minimization requirements.

In *Lu*, the government at least attempted to comply with a warrant's **express** minimization requirements—identical to those at issue here—by only conducting keyword searches to locate *in-scope* data. *See United States v. Fu-Tain Lu*, No. CR-09-00341 RMW, Doc. No. 112, p. 4 (N.D.Cal., Sept. 16, 2010). The court in *Lu* found that “the method used

27 101. *See id.*

28 102. *See Facts*, Section I, ¶ Nos. 8 & 11-14, *supra*.

1 by Agent Zaborowski, assuming he made appropriately narrow word searches, [means that]
 2 only those documents that had a likelihood of being within the scope of the warrant were
 3 examined by human eyes. Thus, potential Fourth Amendment concerns were minimized.”
 4 *Id.* at p. 5. In the present case, “the only keywords used were to find credit card
 5 numbers”^[103] and IRS-CI Agent Daun instead used her “human eyes” to manually look at a
 6 multitude of the defendant's files in order to determine if any given file fell within the scope
 7 of the warrant.^[104] In *Lu*, the court assumed narrow keyword searches and denied the
 8 motion to suppress but granted discovery with respect to what files were “looked at” so the
 9 defense would have an opportunity to file for “reconsideration if [][it] discovers that the
 10 Government did a search of the mirror images that was not reasonably designed to find only
 11 documents, files or data described in the warrant[.]” *Id.* In the present case, the defendant
 12 does not have a list of precisely which files were “looked at” because keyword searches were
 13 not employed and the government failed to preserve a list of “human eye” reviewed files.
 14 [105] However, based on the October 22, 2012 prosecution report,^[106] the defendant
 15 presumes that **all** files were looked at using “human eyes,” which is a reasonable
 16 presumption given how long the fishing exhibition lasted and given the wording used in the
 17 report. The government looking at **all** of the defendant's files, over a very long period of

18 103. *Fifth Submission Of Consolidated Exhibits Relating To Discovery And Suppression*
 19 *Issues, EXHIBIT 01* (Dkt. #929-1, p. 7). Note: the defendant has no qualm with the
 20 government conducting adequately narrow keyword searches (of data content) to identify *in-*
scope files and thereafter using “human eyes” to view the matching files to confirm that they
 21 are in fact *in-scope*. However, skipping right to an arbitrary “human eye” review of a
 22 multitude of files—as was done by IRS-CI Agent Daun—is a blatant Fourth Amendment
 23 violation and also a violation of the “Computer Search Protocol” contained in the relevant
 24 warrants.

25 104. IRS-CI Agent Daun conducted her extensive “human eye” review of the contents of a
 26 multitude of the defendant's files even while realizing early on that the defendant “tended to
 27 be kind of descriptive” with file and folder names corresponding to data responsive to the
 relevant warrants. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery*
And Suppression Issues, EXHIBIT 04 (Dkt. #929-1, p. 21). *See also Facts, Section I,* ¶ No.
 11, *supra*.

28 105. *See Motion To Suppress All Digital Data Evidence As A Sanction For Failure To*
Preserve Evidence (Dkt. #931); *see also Reply To Government's Response To Motion For*
Discovery RE: Digital Evidence Search, Section I(D) (Dkt. #930).

106. *See Fifth Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #929-1, p. 7).

1 time, supports the defendant's claim of exploratory rummaging and indiscriminate fishing.

2 **b The government could have conducted an effective search**
 3 **while at the same time protecting the defendant's privacy**
 interests.

4 Contrary to some other cases,^[107] and in light of the express minimization terms of
 5 the warrants, the defendant need not posit any effective alternative search method
 6 considering file-by-file, "human eye" review is the epitome of doing absolutely **nothing** in
 7 terms of limiting agent exposure to *out-of-scope* data. Although no specific guidelines were
 8 provided, the relevant warrants required that the government do *something* and by doing
 9 *nothing* the government clearly violated the warrants' minimization terms. However, if the
 10 Court requires suggestions, there are numerous alternatives to abrasive, file-by-file "human
 11 eye" review that could have been employed. For example, aside from employing available
 12 minimization technology, the government could have began by **not** passing around virtual
 13 machine clones of the defendant's entire computer system, which allowed numerous
 14 unqualified government actors to access *out-of-scope* data outside the forensic environment.
 15 In any event, the case agents could have stopped using their "human eyes" to review data
 16 content once it was determined in August of 2008 that the defendant accurately labeled his
 17 files and folders containing the *in-scope* data.^[108] At that point, there was no longer any
 18 suspicion of the defendant "do[ing] all [][he could] to conceal contraband, including the
 19 simple expedient of changing the names and extensions of files to disguise their content from

 21
 22
 23
 24
 25 107. See United States v. Burgess, 576 F.3d 1078, 1095 (10th Cir. 2009) ("Burgess
 26 complains the particular methodology used in this case was over broad, yet he offers no
 27 alternative methodology that would protect his legitimate interests and also permit a
 thorough search for evidence of drug trafficking."); United States v. Brooks, 427 F.3d 1246,
 1251 (10th Cir. 2005) (defendant did not suggest "how the search in this case would have
 been different with a scripted search protocol.").

28 108. See *Facts*, Section I, ¶ No. 11, *supra*.

1 the casual observer.” Hill, 459 F.3d at 978.^[109] Unlike in *Adjani*,^[110] a case where the
 2 Ninth Circuit rejected a defendant’s self-labeling argument, IRS-CI Agent Daun not only
 3 lacked a reason to not “trust the suspect’s self-labeling,” 452 F.3d at 115, she **relied upon**
 4 said labeling to increase the efficiency of the FBI’s investigation into computer code.^[111]
 5 Had the government also used the defendant’s accurate labeling as a means to only
 6 “examine[] suspicious and out-of-place folders,” it would have more effectively “engaged in
 7 a focused search of the hard drives rather than a general search.” United States v. Stabile,
 8 633 F.3d 219, 239-40 (3rd Cir. 2011). However, even if not reasonable to rely upon the
 9 defendant’s confirmed accurate labeling, AccessData FTK has the ability to identify files via
 10 header analysis, conduct OCR conversions, and facilitate sophisticated keyword searches.
 11 *See infra.*

12 As for minimization technology available at the time of the initial physical searches
 13 and continuing through the government’s more than three year long fishing exhibition, there
 14 were numerous tools available that the government could have used to conduct an effective
 15 search while also meeting the requirement to “expose only those categories of files,
 16 documents, or other electronically stored information that are identified with particularity in
 17 the warrant...”^[112] Addressing a computer forensic search using early **2003** technology, the
 18 Ninth Circuit in *Giberson* upheld file-by-file, “human eye” review but “acknowledge[d] that
 19 new technology may become readily accessible to enable more efficient or pinpointed

20 109. Rather than employ phony file/folder names and file extensions, the defendant
 21 employed DriveCrypt encrypted virtual drives of which IRS-CI Agent Daun was able to
 22 access as soon as she sat down at the defendant’s computer. *See Government’s Response To*
Defendant’s Motion To Suppress (Dkt. #873, p. 26) (“Fortunately for the investigation
 23 team,... [w]hen entry was made pursuant to the search warrant, [the] defendant’s computer
 24 was found to be unsecured and logged on, no password was needed in this instance in order
 25 to access the files.”); *Fourth Submission Of Consolidated Exhibits Relating To Discovery*
And Suppression Issues, EXHIBIT 14 (Dkt. #898-1) (**August 25, 2008** email from IRS-CI
 Agent Daun to AUSA Battista: “I was able to image each of the items and feel pretty
 confident that I have gotten around the encryption issue.”).

26 110. United States v. Adjani, 452 F.3d 1140 (9th Cir. 2006).

27 111. *See Facts, Section I, ¶ No. 11, supra.*

28 112. *E.g., Submission Of Documents Related To Original Northern District Of California*
08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122, Warrant,
“Computer Search Protocol For The Northern District Of California” (Dkt. #566-2, p. 17).

1 searches of computer data, and that, if so, we may be called upon to reexamine the
 2 technological rationales that underpin our Fourth Amendment jurisprudence in this
 3 technology-sensitive area of the law.” United States v. Giberson, 527 F.3d 882, 890 (9th Cir.
 4 2008) (markup and citation omitted) [addressing a warrant with **no** minimization
 5 requirements]. For the July, 2008 searches approved by courts having jurisdiction over the
 6 technology capital of the planet,^[113] it is objectively reasonable^[114] to conclude that the
 7 warrants contemplated use of some of the so-called new technology in order to comply with
 8 the express minimization requirements. Society's prior technological limitations may have
 9 once provided justification for courts to not “restrict[] the search... to specific search terms,
 10 [considering doing so] would likely have failed to cast a sufficiently wide net...,”^[115]
 11 however, in late 2008 there were a number of software tools available that could have been
 12 used to effectively employ *in-scope* keyword searches and similar minimization methods
 13 contemplated by the warrants. First, copies of image files such as a PDFs, JPGs, GIFs,
 14 BMPs, and TIFFs could have been converted using Optical Character Recognition (OCR)
 15 software so that all text, handwriting, markings (*e.g.*, barcodes), and graphics were
 16 searchable.^[116] Running an imaged based document through OCR and then conducting

17 113. *I.e.*, Silicon Valley.

18 114. “Fourth Amendment reasonableness is predominantly an objective inquiry.... This
 19 approach recognizes that the Fourth Amendment regulates conduct rather than thoughts; and
 it promotes evenhanded, uniform enforcement of the law.” Ashcroft v. al-Kidd (al-Kidd II),
 131 S.Ct. 2074, 2080 (2010).

20 115. Adjani, 452 F.3d at 1149-50. Note: the warrant in *Adjani*, which was executed in the
 21 context of January 2004 technology, did not contain express minimization requirements like
 the warrants at issue in the present case. Furthermore, this defendant is not advocating any
 22 “specific search terms” like the defendant did in *Adjani*. See *Lu*, No. CR-09-00341 RMW,
 Doc. No. 112 (not applying *Adjani* and accepting **government chosen** keyword searches as
 23 an adequate minimization method – subject to later review as to reasonableness).

free encyclopedia, http://en.wikipedia.org/wiki/Handwriting_recognition (last accessed: Nov.
 27 15, 2012) (Note: rather than detect characters, targeted keyword matching increases accuracy
 28 by reducing the problem domain – for example, automatic handwritten postal address
 recognition used by the USPS – which is perfect for a targeted handwritten keyword

1 keyword searches eliminates problems that arise, for example, when a documents is “in ‘tiff’
 2 format,” or a ““digital picture of a hard copy document’ that has been scanned[.]”^[117]
 3 Second, in order to determine if *in-scope* sound data is hidden within commercial music mp3
 4 audio, the government could have used the Cddb database^[118] to authenticate/verify “full
 5 CD” mp3 folders or used technology from SoundHound, Inc.^[119] to authenticate/verify any
 6 given individual mp3. Speaker-independent speech recognition could have then been
 7 applied to all suspect mp3 files in order to match audio data segments corresponding to all
 8 possible targeted spoken keywords.^[120] Similar image/speech analysis methods apply to
 9 videos in AVI and other formats, which are all just combinations of still images and audio
 10 tracks.^[121] Third, in order to detect misspelled words, typos, and code words corresponding
 11 to targeted keywords, the government could have expanded each keyword search to include
 12

13 computer forensic search); Wikipedia [website], *Computer vision – Wikipedia, the free*
encyclopedia, http://en.wikipedia.org/wiki/Computer_vision (last accessed: Nov. 15, 2012)
 14 (“**Content-based image retrieval** – finding all images in a larger set of images which have a
 15 specific content. The content can be specified in different ways, for example in terms of
 16 similarity relative to a target image (give me all images similar to image X), or in terms of
 17 high-level search criteria given as text input (give me all images which contains many
 18 houses, are taken during winter, and have no cars in them.”).

30 121. See, e.g., Daniel, *Digital Forensics For Legal Professionals*, p. 21 (“Digital video and
 photo forensics are grouped together for a reason. A photo is a still image, and a video is a
 sequence of still images. When you watch a video, it is a sequence of still images changing
 so fast that it appears as continuous movement.”).

1 misspelled/typo/code variants – as listed in any number of “misspelled word databases” like
 2 those used by the Google search engine and by Wikipedia.^{[122][123][124]} For example,
 3 searching “Jug Davi G. Camell” on the Google search engine automatically corrects to
 4 “Judge David G. Campbell,”^[125] i.e., detecting the typos and using a proximity analysis to
 5 convert the codeword “Jug” to “Judge.” In the event of “human eye” review being
 6 unavoidable for any given file, the case agents could have either (1) had a neutral and
 7 walled-off third-party conduct the forensic analysis of the target file with instructions to
 8 return only *in-scope* data to the case file, or (2) sought judicial authority to ignore the express
 9 minimization requirements. Because the defendant has suggested both technology based and
 10 non-technology based ways of how an effective forensic analysis could have been conducted
 11 in compliance with the warrants' minimization requirements, cases such as *Burgess* and
 12 *Giberson* cannot be used to belittle the warrants' terms and reject the defendant's arguments.
 13 [126]

14 **c The defendant has been prejudiced by the government's
 15 failure to comply with minimization requirements.**

16 The government's failure to conduct a forensic examination designed to “expose only
 17 those categories of files, documents, or other electronically stored information that are

20 123. See also Dumbtionary [website], *Dumbtionary.com a dictionary of misspelled words*,
 21 <http://www.dumbtionary.com> (last accessed: Nov. 16, 2012) (“Just type the correct word
 above with a plus sign (+) before it and if misspellings are available they will be shown. If
 no misspellings are available, check back soon because we will find them and add them.”).

22 124. See also fn. No. 99 (AccessData FTK has on-the-fly misspelled/typo/code word
 23 keyword search capability).

24 125. *Sixth Submission Of Consolidated Exhibits Relating To Discovery And Suppression*
 Issues, EXHIBIT 03 (Dkt. #933-1) (google search engine result for “Jug Davi G. Camell”).

25 126. One may counter that “human eye” review cannot be avoided due to the possibility of
 26 criminals inventing new and innovative ways to hide *in-scope* data in seemingly innocuous
out-of-scope digital files. However, the same is true for paper documents. For example,
 27 there is always a possibility that a suspect will use tiny microprint to hide a drug ledger
 within his medical records or a *Sir Francis Bacon* open code system to hide evidence of
 28 insider trading within a series of love letters. However, those mere possibilities have never
 justified the government taking a microscope to an *out-of-scope* medical file or sending a
 box of *out-of-scope* love letters to a cryptanalyst.

1 identified with particularity in the warrant...”^[127]—during the more than three year long
 2 fishing exhibition—also resulted in identifiable prejudice to the defendant. Overall, the
 3 government's lengthy, indiscriminate, “human eye” rummaging resulted in government
 4 actors collecting and sharing the defendant's private *out-of-scope* data and information
 5 gleaned therefrom. For example, IRS-CI Agent Daun seized the file
 6 “agj_bag_liner_jagbags.co.nz.txt” in October of 2011. The file at issue contains personal
 7 communications between the defendant and Jacqueline Gardiner. The prosecution has
 8 already admitted that “agj_bag_liner_jagbags.co.nz.txt” will not be used as evidence
 9 considering it is not amongst the list of data falling within the scope of the warrant. AUSA
 10 Battista indicated that “[s]earches for evidence **to be used in this case** are being limited to
 11 the materials indexed in the February 25, 2010, discovery[,]”^[128] *i.e.*, various reports listing
 12 specific files seized by IRS-CI Agent Daun **not** including “agj_bag_liner_jagbags.co.nz.txt.”
 13 The fact that the government continues an ongoing search through the forensic images, *etc.*
 14 for the purpose of seizing data not responsive to the N.D.Cal. 08-70460-HRL/PVT warrant
 15 —or even relevant to **this case**—is an additional indication that the unauthorized fishing
 16 exhibition was/is anything but harmless. As another example, IRS-CI Agent Daun exposed
 17 herself to enough *out-of-scope* data to learn of the defendant's interests in outdoor activities,
 18 vitamins, and nutrition.^[129] IRS-CI Agent Daun then shared her *out-of-scope* knowledge
 19 with AUSA Battista and posited that she obtain the relevant files for his personal review.^[130]
 20 Even if the Court were to find the warrants' minimization terms trivial and accept as
 21 constitutional some form of indiscriminate, file-by-file, “human eye” review,^[131] IRS-CI

 24 *“Computer Search Protocol For The Northern District Of California”* (Dkt. #566-2, p. 17).

25 128. *See Second Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 088 (Dkt. #821-5) (emphasis added).

26 129. *See Facts, Section I, ¶ No. 12, supra.*

27 130. *See id.*

28 131. *See United States v. Giannetta*, 909 F.2d 571, 577 (5th Cir. 1990) (“Courts have
 regularly held that in searches for papers, the police may look through notebooks, journals,
 briefcases, file cabinets, files and similar items and briefly peruse their contents to determine
 whether they are among the documentary items to be seized.”); *Manno v. Christie*, 2008 WL

1 Agent Daun's conduct is far from the equivalent of briefly perusing or skimming a paper
 2 document and then ignoring it once the *out-of-scope* or privileged nature is realized. For
 3 IRS-CI Agent Daun's more than three year long digital search, rather than keep *out-of-scope*
 4 files/knowledge to herself, she flagrantly shared it with others involved in the investigation.
 5 [132]

6 **B. Suppression of all digital evidence is merited based on technical
 7 violations of the 30-day search window limitations contained in the
 N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants.**

8 Even if the Court finds that no indiscriminate fishing occurred, suppression of *all*
 9 digital evidence—or, in the alternative, suppression of digital evidence seized beyond the
 10 relevant 30-day search windows—is still an appropriate remedy for the related technical
 11 violations of the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants.^[133] As
 12 explained above, the warrants required that (1) some type of minimization procedures be
 13 employed, and (2) all data be searched/seized from the forensic images, *etc.* within 30
 14 calendar days of the initial searches used to seize the physical data storage devices. As was
 15 discussed in the wholesale suppression subsection, IRS-CI Agent Daun did not complete her
 16 search and seizure of data, by copying said data to DVDs and a CD,^[134] until September 8,

17 4058016, p. 4 (D.N.J. Aug. 22, 2008) (in context of warrant having **no minimization**
 18 **requirements**, it is “reasonable for [][an agent] to briefly review each electronic document
 to determine if it is among the materials authorized by the warrant, just as he could if the
 search was only of paper files”).

19 132. *See Andresen v. Maryland*, 427 U.S. 463, 482 fn. 11.(1976) (noting that when search
 20 warrants authorize the seizure of documents, “responsible officials, including judicial
 21 officials, must take care to assure that they are conducted in a manner that minimizes
 unwarranted intrusions upon privacy.”).

22 133. If the Court decides to only suppress digital evidence obtained *after* the expiration of
 23 the 30-day search window applicable to the N.D.Cal. 08-70460-HRL/PVT warrant,
 suppression of all evidence obtained under the N.D.Cal. 08-70502-PVT warrant would not
 24 be an automatic consequence of suppression, *i.e.*, fruit-of-the-poisonous-tree. *See Third*
Submission Of Consolidated Exhibits Relating To Discovery And Suppression Issues,
 25 EXHIBIT 05 (Dkt. #863-1) (explaining how IRS-CI Agent Daun seized a text file on August
 3-4, 2008 (within the 30-day search window applicable to the N.D.Cal. 08-70460-HRL/PVT
 26 warrant) leading to the search of storage unit No. A-47). However, the technical violations
 explained in this subsection still independently apply to all digital evidence seized from the
 forensic images and virtual machine clones stemming from the search of storage unit No. A-
 27 47 under the N.D.Cal. 08-70502-PVT warrant.

28 134. *See Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI
 Agent Daun RE: search of data storage devices and encrypted virtual drives seized from

1 2009—371 days and 370 days past the respective deadlines.^[135] In an opinion addressing an
 2 argument nearly identical to the defendant's, the Central District of California suppressed all
 3 digital evidence seized by the government after a 60-day forensic search deadline had
 4 expired. *See United States v. Salceda*, 2012 U.S. Dist. LEXIS 28211, CR 10-274 CAS
 5 (C.D.Cal., Feb. 27, 2012).^[136] Similar to *Salceda*, the defendant is requesting suppression
 6 of all digital evidence seized after the expiration of the relevant 30-day search windows. *See*
 7 *also United States v. Brunette*, 76 F. Supp. 2d 30, 42 (D. Maine 1999), aff'd, 256 F.3d 14 (1st
 8 Cir. 2001) (suppression appropriate because the government failed to comply with time
 9 limits for reviewing seized computers when those time limits were required by the warrant).
 10 Likewise, the defendant is also requesting suppression of *all* seized digital data as a remedy
 11 for the violations of the minimization requirements.

12 In the context of violating a judicially created policy related to the Fourth
 13 Amendment, suppression is merited if the violation was the “unattenuated but-for cause of
 14 obtaining the evidence.” *United States v. Hector*, 474 F.3d 1150, 1154 (9th Cir. 2007)
 15 (paraphrasing *Hudson v. Michigan*, 547 U.S. 586 (2006)). Just like in *Salceda*, the violation
 16 challenged in the present case is a clear unattenuated but-for cause of obtaining all digital
 17 evidence beyond the relevant deadlines. Similarly, the minimization violation is a clear
 18 apartment No. 1122 and storage unit No. A-47).

19 135. *See Facts*, Section I, ¶ No. 2, *supra*.

20 136. After the execution of the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants
 21 on August 3-4, 2008, Rule 41 was amended in 2009 as follows:

22 “Unless **otherwise specified**, the warrant authorizes a later review of the media
 23 or information [(e.g., forensic images)] consistent with the warrant[]” and that
 24 any time limits set forth in Rule 41 do not refer to “any later off-site copying or
 25 review.”

26 Fed. R. Crim. P., 41(e)(2)(B) (emphasis added) (2009).

27 However, even if the 2009 version of Rule 41 is relevant here, the N.D.Cal. 08-70460-HRL/
 28 PVT and 08-70502-PVT warrants still “otherwise specified,” *id.*, that “later off-site copying
 29 or review,” *id.*, of the defendant’s data be completed within 30 days. *See also United States*
v. Winther, 2011 U.S. Dist. LEXIS 133799, No. 11-212 (E.D.Pa., Nov. 18, 2011) (“The rule
 does not prevent a judge from imposing a deadline for the... access to the electronically
 stored information at the time the warrant is issued.” (quoting committee Comments to 2009
 Amendments to Rule 41)); *United States v. Payton*, 573 F.3d 859, 864 (9th Cir. 2008) (“We
 believe that it is important to preserve the option of imposing [] [search] conditions when
 they are deemed warranted by judicial officers authorizing the search of computers.”).

1 unattenuated but-for cause of obtaining *all* digital evidence, regardless of time deadlines,
 2 considering the abrasive, file-by-file “human eye” review was the only type of search
 3 conducted by the government from the outset.

4 Under a Rule 41 violation analysis, which may offer guidance here,^[137] suppression
 5 is merited for non-constitutional violations of the rule if either (1) “the defendant was
 6 prejudiced, in the sense that the search would not have occurred or would not have been so
 7 abrasive if law enforcement had followed the Rule” or (2) “officers acted in ‘intentional and
 8 deliberate disregard’ of a provision in the Rule.” United States v. Williamson, 439 F.3d 1125,
 9 1132 (9th Cir. 2006) (citation omitted). The government certainly cannot claim that its first
 10 401-day file-by-file, “human eye” search and thereafter 28-month long file-by-file, “human
 11 eye” search were anything but intentional, deliberate, and in plain contradiction to the terms
 12 of the warrants. Furthermore, the defendant is certainly prejudiced by the government
 13 seizing digital evidence during the 371 days and 370 days following the 30-day deadlines.
 14 For example, if the government were to go through its records and collect only that which
 15 was isolated (*i.e.*, seized) from the forensic images, *etc.* within the required 30-day search
 16 windows, the amount of useable digital evidence would be almost null. Likewise, it
 17 certainly created a more abrasive search to allow numerous unqualified agents access to
 18 virtual machine clones of the defendant’s entire computer system and storage devices for
 19 more than a year. It certainly created a more abrasive search to have those agents conduct a
 20 “human eye” review while the clones “actually contain[ed] many more files than those that
 21 fall within the parameters of the Search Warrant and its attachments.”^[138]

22
 23
 24
 25 137. The defendant is not alleging a Rule 41 violation. However, the noted case law may
 26 provide guidance on whether technical violations of a warrant’s terms, as articulated by the
 27 issuing magistrate, merits suppression of evidence.

28 138. *See Third Submission Of Consolidated Exhibits Relating To Discovery And*
Suppression Issues, EXHIBIT 01 (Dkt. #863-1) (“Computer Forensic Report” by IRS-CI
 Agent Daun RE: search of data storage devices and encrypted virtual drives seized from
 apartment No. 1122 and storage unit No. A-47).

1 **C. Suppression of all digital evidence is merited considering IRS-CI
2 Agent Daun's seizure of digital data past the 30-day deadlines was
3 done without supporting findings of probable cause.**

4 In addition to preventing the government from engaging in indiscriminate fishing, the
5 directives contained in the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants—
6 requiring that all digital evidence be searched/seized from the forensic images within 30 days
7 unless an extension of time is granted—are intended to ensure that the issuing magistrate
8 renew the probable cause findings upon each granted time extension. Because the
9 government continued to search for and seize evidence after the 30-day search windows had
10 expired, those additional searches/seizures were not supported by findings of probable cause.
11 Even if the government attempts to argue that probable cause did not dissipate after the
12 expiration of the 30-day search windows,^[139] and that the issuing magistrate would have
13 therefore found that probable cause continued to exist, “[t]he Fourth Amendment
14 contemplates a prior judicial judgment, not the risk that executive discretion may be
15 reasonably exercised.” United States v. United States District Court, 407 U.S. 297, 317
16 (1972); *see also* United States v. Mejia, 69 F.3d 309, 320 (9th Cir. 1995) (“If evidence were
17 admitted notwithstanding the officers’ unexcused failure to obtain a warrant, simply because
18 probable cause existed, then there would never be any reason for officers to seek a warrant
19 [(or an extension of a warrant for that matter)].”). Because the issuing magistrate did not
20 make a finding of probable cause to search for and seize the defendant’s digital data for 371
21 days beyond the time authorized, all digital evidence seized beyond the 30-day search
22 windows must be suppressed.

23 **D. The government has no valid good-faith claim upon which it can
24 rely in order to erase its Fourth Amendment violations.**

25 The government fails to advance a good-faith claim justifying the above outlined
26 Fourth Amendment violations. To the contrary, the government’s own warrant applications
27 and conduct destroy all good-faith arguments that one may attempt to advance in this case.

28

29 139. *See United States v. Brewer*, 588 F.3d 1165, 1173 (8th Cir. 2009) (“[T]he delay had no
30 effect on the probable cause determination. The computer media at issue here were
31 electronically-stored files in the custody of law enforcement.”).

1 First, the government voluntarily requested that the 30-day search window limitation and
 2 minimization requirements be included in the issued warrants.^[140] The government cannot
 3 now claim that it merely made an innocent mistake in interpreting the warrants or that it was
 4 not aware of the very terms it requested and then violated.^[141] Second, the government did
 5 not seek authority to later ignore the minimization requirements or request extensions of time
 6 past the initial 30 days in order to continue its searches and seizures. *Compare United States*
 7 *v. Mutschelknaus*, 592 F.3d 826, 830 (8th Cir. 2010) (“Here, the officers’ explicit request for
 8 an extension shows a manifest *regard* for the issuing judge’s role in authorizing searches,
 9 rather than a bad faith attempt to circumvent federal requirements.” (internal markup and
 10 citation omitted)). Third, if IRS-CI Agent Daun, or the IRS-CI as a whole, lacked the skill or
 11 resources to conduct a timely and private forensic analysis, assistance from FBI CART could
 12 have been sought. In April of 2010, Nathan Gray, Special Agent in Charge of the FBI-
 13 Phoenix Division, said that the multi-agency investigation producing the defendant’s arrest
 14 was “an excellent example of law enforcement cooperation between the IRS - Criminal
 15 Investigations, the U.S. Postal Inspection Service, and the FBI,”^[142] therefore, the FBI
 16 CART assisting with a proper forensic analysis would not have been a problem. Fourth,
 17 contrary to what the October 22, 2012 prosecution report may imply, the Ninth Circuit’s
 18 string of *CDT* opinions^[143] do not objectively affect the government’s conduct or decision
 19 making in this case. The noted prosecution report has an August 28, 2009 table entry stating

20 140. *See, e.g., Submission Of Documents Related To Original Northern District Of*
 21 *California 08-70460-HRL Search Warrant Used To Physically Search Apartment No. 1122*
 22 *(Dkt. #566-1)* (government’s warrant application with “Attachment C” detailing 30-day
 search window and minimization requirements).

23 141. *See Groh v. Ramirez*, 540 U.S. 551, 564 (2004) (implying a general rule that if a law
 enforcement official prepares a warrant, he cannot later note problems in the warrant’s text in
 order to support a claim of qualified immunity).

24 142. U.S. Attorney’s Office, District of Arizona, *press release No. 2010-060 (Rigmaiden, et*
 25 *al.)*, “Hacker’ Indicted In Massive Tax, Mail, And Wire Fraud Scheme,” *available at*
<http://www.justice.gov/criminal/cybercrime/rigmaidenIndict.pdf> (last accessed: Feb. 15,
 2011).

26 143. *See (1) United States v. Comprehensive Drug Testing, Inc.*, 513 F.3d 1085 (9th Cir.
 27 January 24, 2008), *(2) United States v. Comprehensive Drug Testing, Inc.*, 545 F.3d 1106 (9th
 28 Cir., September 30, 2008), *(3) United States v. Comprehensive Drug Testing, Inc.*, 579 F.3d
 989, 1006 (9th Cir., August 26, 2009), and *(4) United States v. Comprehensive Drug Testing,*
Inc., 621 F.3d 1162 (9th Cir., September 13, 2010) (all interchangeably referred to as “CDT”).

that “[d]ue to CDT issues in the 9th Circuit, IRS case agents and FBI agents were instructed to no longer access virtual machines and data.”^[144] Presumably, the government means that before August 26, 2009, it was relying upon the January 24, 2008 version of *CDT*, i.e., 513 F.3d 1085, to justify its failure to comply with the express time limitations and minimization requirements contained in the relevant warrants. However, that version of *CDT* was vacated by the Ninth Circuit on September 30, 2009^[145]—a mere 27 days into the government's initial 401-day fishing exhibition. Likewise, IRS-CI Agent Daun's additional 28-month long fishing exhibition occurred even after the release of the *en banc* August 26, 2009 version of *CDT*. Nevertheless, even if the Court were to consider a hypothetical good-faith reliance on the vacated version, the only prior *CDT* point even remotely relevant to the present case was the Ninth Circuit's use of a (now defunct) backhanded legal analysis^[146] intended to expand “plain view” as a means to seize *out-of-scope* digital evidence relating to crimes not listed in a warrant. However, “plain view” is irrelevant to the defendant's Fourth Amendment challenges considering the government has identified no *out-of-scope* evidence it plans to use in support of new charges or investigations.^[147] In other words, the “plain view” doctrine is entirely separate from the Fourth Amendment question at issue here, i.e., whether it was illegal for the government to conduct a fishing exhibition while violating the express terms

18 144. *Fifth Submission Of Consolidated Exhibits Relating To Discovery And Suppression*
 19 *Issues, EXHIBIT 01* (Dkt. #929-1, p. 9).

20 145. See *CDT*, 545 F.3d 1106 ((Rehearing, *en banc*, granted and, as of September 30, 2008, “[t]he three-judge panel opinion shall not be cited as precedent by or to any court of the Ninth Circuit.”).

21 146. See *CDT*, 513 F.3d at 1112 fn. No. 48 (“We do not reach the government's argument that the “plain view” exception to the warrant requirement justified seizure of the intermingled evidence, because the [blanket, indiscriminate seizure and viewing of all digital data] evidence fell within the scope of the search warrant.” [addressing warrant with **no** minimization requirements or time limits]), *vacated*, 545 F.3d 1106; *but see CDT*, 579 F.3d at 1006 (Framing the dispute as a “plain view” issue, finding that “[t]he process of segregating electronic data that is seizable from that which is not must not become a vehicle for the government to gain access to data which it has no probable cause to collect.”).

26 147. However, the government does seem to at least imply that it will use *out-of-scope* data seizures as evidence in *other* cases. See *Second Submission Of Consolidated Exhibits Relating To Discovery And Suppression Issues, EXHIBIT 088* (Dkt. #821-5) (“Searches for evidence to be used in **this case** are being limited to the materials indexed in the February 25, 2010, discovery.” (emphasis added)). If the government does have this plan, it will have to deal with the defendant's *pro se* Fourth Amendment defense once again.

of the noted warrants' "Computer Search Protocol" by using multiple sets of "human eyes" to indiscriminately rummage through personal, private and privileged *out-of-scope* files for over three years while failing to disregard data reflective of no crime at all. Even the vacated *CDT* opinion held that "a Fourth Amendment violation could still occur if the government did not comply with the warrant protocol[.]"^[148] Notably, the *CDT* case as a whole did **not** involve the type of minimization requirements and time limitations contained in the warrants at issue in the present case. Nor did the *CDT* agents review, share, and discuss a multitude of private data relating to no crimes at all. Contrary to what IRS-CI Agent Daun and the other case agents may have believed, there was nothing prior to the August 26, 2009 *CDT* opinion allowing the government to engage in protracted, indiscriminate, exploratory rummaging into private *out-of-scope* digital data while ignoring a warrant's express terms not to do so. The Ninth Circuit did not somehow "reinstate" the Fourth Amendment for digital searches on August 26, 2009 or even on September 30, 2008. To the contrary, the Fourth Amendment was in play all along.

III. **Conclusion: Exclusion is an appropriate remedy and all illegally obtained evidence and derivative evidence must be suppressed.**

*. In light of the new evidence provided to the defense by the government on June 21, 2012 and on October 22, 2012, the following conclusion supplements, corrects, and supersedes the conclusion contained in the defendant's *Motion To Suppress* (Dkt. #824), *Memorandum Re: Fourth Amendment Violations (re: N.D.Cal. 08-70460-HRL/PVT)* (Dkt. #830-1), *Conclusion*, Section III—however, only applicable to arguments relating to searches/seizures of digital evidence as raised in this filing, Section II, *supra*.^[149]

As a remedy for any or all of the herein explained violations, and in order to deter the government from engaging in similar misconduct in the future, the defendant respectfully requests that the Court suppress the following evidence obtained illegally in this case:

148. *CDT*, 513 F.3d at 1107 fn. No. 44, *vacated*, 545 F.3d 1106.

149. In other words, the *Conclusion* contained in *Memorandum Re: Fourth Amendment Violations (re: N.D.Cal. 08-70460-HRL/PVT)* (Dkt. #830-1), Section III, remains applicable to suppression arguments contained in Sections II(A) and (B) of Dkt. #830-1—*i.e.*, relating to Fourth Amendment violations not involving searches/seizures of digital evidence.

EVIDENCE TABLE

#	Evidence sought to be suppressed:
1	Wholesale suppression of all physical effects—which encompasses <i>all</i> digital data as <i>fruits-of-the-poisonous-tree</i> —seized under the N.D.Cal. 08-70460-HRL/PVT (apartment No. 1122) and 08-70502-PVT (storage unit No. A-47) warrants, as a sanction for the government's fishing exhibition with respect to searched/seized digital evidence;
2	Suppression of all <i>digital evidence</i> seized under the N.D.Cal. 08-70460-HRL/PVT (apartment No. 1122) and 08-70502-PVT (storage unit No. A-47) warrants, both before and after the 30-day search window, as either a sanction for the government's fishing exhibition with respect to searched/seized digital evidence or as a sanction for one or both technical violations of the warrants, <i>i.e.</i> , 30-day search window and/or minimization;
3	Suppression of data isolated (<i>i.e.</i> , seized) from government forensic images and virtual machine clones of physically seized data storage devices and encrypted virtual drives, but applicable to data seized after the first 30 days following the in-person search of apartment No. 1122 (N.D.Cal. 08-70460-HRL/PVT warrant), [<i>e.g.</i> , data contained on the September 8, 2009 DVDs and CD referenced in IRS-CI Agent Daun's "Computer Forensic Report," data seized after the first 30 days into the government's initial 401-day fishing exhibition, and data seized during the government's subsequent 28-month fishing exhibition] as a sanction for the 30-day search window technical violations of the relevant warrants;
4	Suppression of seized physical data storage devices and encrypted virtual drives that contain many more files than those falling within the scope of the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants;
5	Suppression of government forensic hard drive images / copies / virtual machine clones of seized physical data storage devices and encrypted virtual drives that contain many more files than those falling within the scope of the N.D.Cal. 08-70460-HRL/PVT and 08-70502-PVT warrants;
6	All derivative evidence, <i>i.e.</i> , fruits-of-the-poisonous-tree, stemming from primary evidence sought to be suppressed (<i>see</i> Nos.1-5 above) including, but not limited to, all evidence seized pursuant to the N.D.Cal. 08-70502-PVT warrant, N.D.Cal. 08-70503-PVT warrant, E.D.Cal. 08-SW-0586-EFB warrant, D.Ariz. 08-3397MB-LOA warrant, D.Ariz. 08-3399MB-LOA warrant, D.Ariz. 08-3401MB-LOA warrant, D.Ariz. 08-3403MB-LOA warrant, D.Ariz. 08-3402MB-LOA warrant, D.Ariz. 08-3398MB-LOA warrant, D.Ariz. 08-6038MB-DKD warrant, D.Ariz. 09-7124MB-ECV warrant, and all other warrants;

This filing was drafted and prepared by the *pro se* defendant, however, he authorizes his shadow counsel, Philip Seplow, to file this filing on his behalf using the ECF system. The defendant is appearing *pro se* and has never attended law school. The defendant's filings, however inartfully pleaded, must be liberally construed and held to less stringent standards than formal pleadings drafted by lawyers. *See Haines v. Kerner*, 404 U.S. 519, 520 (1972).

LRCrim 12.2(a) requires that the undersigned include the following statement in all

1 motions: “Excludable delay under 18 U.S.C. § 3161(h)(1)(D) will occur as a result of this
2 motion or of an order based thereon.”
